

Tips und Tricks

How do I remove a player from scheduled games?

If a player has already been added to one or more games, however, he will now be not planned anymore (e.g. because he changed the team) you can remove this player from scheduled games as follows.

The player can NOT simply be deleted from the game!

Change player status

Under GAMES - TEAMS select the desired team and the player. Press the button ADD TO GAMES.

Enter the time period in which the player is not to participate in the games anymore and set his status to “scratched”.

The player will now be listed under "additional players".

The player is not shown the games anymore on the player platform.

Add players/staff to games between dates ×

Start game date	01.09.2019
End game date	31.12.2019
Game status	Scratched ▼
Notes	Change team //

This will add player(s) to all games between selected dates.

How do I remove a player from a scheduled practice?

If a player has already been added to one or more practices, however, he will now be not planned anymore (e.g. because he has changed the practice group) you can remove this player from scheduled games as follows.

The player can NOT simply be deleted from the training!

Change player status

Under PRACTICES - GROUPS select the desired practice group and the player. Press the button ADD TO PRACTICES.

Enter the time period in which the player is not to participate in the practices anymore and set his status to “scratched”.

The player will now be listed under "additional players". The player is not shown the practices anymore on the player platform.

Add player/status to planned practices ×

Start practice date	01.09.2019
End practice date	31.12.2019
Practice status	Scratched ▼
Notes	Changed practice group

This will add a player to all already planned practices between selected dates
