

Tips und Tricks

How do I manage my team(s) and practice group(s) most efficiently?

Set your seeded regular players to **'healthy'** = **your regular team**.

-> These players see all games and practices in their calendar (= convocation)

Set the **sporadically / partially** used players to **'scratched'** = are your **additional players**.

-> These players do not see the games and practices in their calendar yet (= no convocation)

Important: Make these status changes in your team before you create the games/practices.

-> This is how the **player status is automatically taken over** when creating the games/practices

-> If the games/practices are already created, you have to load the changed status into the individual games (see Tips & Tricks: " How can I import adjusted player data into existing games or practices? ")

When planning the individual practice sessions and games, you can now change the status of certain players from **'scratched'** to **'healthy'** (depending on your schedule).

Tip: Under DASHBOARD - PLAYER - SCHEDULE you have the possibility to compare the schedules of different players.

If a player has been called up for a practice session or game on the same day for different teams, a red marker will be displayed.

How do I manage my team(s) and practice group(s) most efficiently?
